**DETAILED ACTION*****Double Patenting***

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 1 and 2 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1 and 2 of U.S. Patent No. 6,327,573. Although the conflicting claims are not identical, they are not patentably distinct from each other because the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter, as follows:

A reward method comprising:

- a. Retrieving a customer record in response to an account identifier.

Art Unit: 3622

- b. Identifying whether a sub-account holder is present.
- c. Transacting with a sub-account holder.
- d. Determining a reward level.
- e. Allocating the determined reward level.
- f. Updating the retrieved customer record.

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Kanter (U.S. Patent Number: 5,537,314).

Claim 1: Kanter discloses a reward method comprising the steps of:

(a) Retrieving, in response to indicium of an account number, a customer record associated with said account number, said customer record including account information identifying an account holder and sub-account information identifying one or more sub-account holders.

(Page 21, lines 9 – 52) (Kanter discloses a program that rewards participants for making individual sales as well as signing up additional participants. When a sale is made, the selling participants account

number is retrieved, this number includes the sub account information containing the account number of the participant's sponsor.)

- (b) Determining if any of said one or more sub-account holders are present. (Page 21, lines 9 – 52) (Verifying that a participant has a sponsor that is **present in a database**, and rewarding said sponsor for sales of the participant)
- (c) Transacting with at least one of a present account holder and a present sub-account holder. (Page 21, lines 9 – 52) (Paying commissions to both the participant and the participant's sponsor)
- (d) Determining, in response to at least one of said step of transacting and said step of determining, a reward level. (Page 21, lines 9 – 52)  
(Reward levels are determined by sales volume.)
- (e) Allocating, to at least one of said account holder and said one or more sub-account holders determined to be present, said determined reward level. (Page 21, lines 9 – 52) (After determining reward levels, the respective commissions are allocated to the participant and their sponsors accounts.)
- (f) Updating, in response to said reward allocation, said retrieved customer record. (Page 21, lines 52 – 64) (The balances in both the participant and their sponsor's accounts are updated)

Claim 2: Kanter discloses the method of claim 1, wherein said step of updating comprises the steps of: increasing, by a respective allocated

amount, a respective accumulated reward level of said account holder and said one or more sub-account holders determined to be present. (Page 21, lines 52 – 64) (The commissions paid will increase, the respective accumulated reward levels of both the participant and their sponsors.)
